

Airball™ Grabber™ Safety Net

Set-Up Instructions

- 1) After unpacking kit, find and unroll net on a large flat surface. (i.e. driveway or garage floor)
- 2) Find mounting bracket assembly (one piece with five threaded holes in it).
- 3) Find and insert five rods into mounting bracket assembly, by hand tightening in a clockwise direction. (Fig. 1)
- 4) After inserting rods, turn rod-side down on the spread net, with the ends of the five rods lined up to the colored leads tied on the net. Please exercise cautions and avoid nearby persons (EYE DANGER).
- 5) Find plastic wire ties and insert one through the pair of holes at the end of each rod. (Fig. 2)
- 6) Secure the net to the rod ends by wrapping the wire tie around the poly rope at the same position as the colored lead string. Pull the wire ties snug. (Fig. 3)
- 7) Attach the assembled kit by:
 - a) Two stainless steel hose clamps to the highest possible position on your Basketball pole support. (Centered at least eight feet from the ground.) Do not fully tighten the clamps.
 - b) Using the holes on the mounting block as pilot guides, secure the assembly with self-tapping screws to the upright pole (Centered at least eight feet from the ground)
- 8) Assistant will now hand up the complete net assembly for you to insert the bottom portion of the bracket into the lower of the hose clamps, after which you will adjust the upper of the two clamps over the top portion of the mounting bracket. Tighten both clamps while holding the net assembly in place. (Fig. 4)
- 9) Secure the bottom of the net in either of the following ways.
 - a) Wrap the bottom of the net around the base of your portable Basketball system and tie the black leads around the pole in front of the system. (Fig. 5)
 - b) Spread the net evenly across the back of the upright pole on a line parallel with the playing court. Stake the end of the net into position with the enclosed stakes. (Fig. 6)
- 10) Retain shipping container for future storage use. Enjoy playing safely.
- 11) For disassembly follow directions in reverse order. Wire ties can be cut for removal, please dispose of in a safe manner.

Components

Net (one) Mounting bracket (one)
Fiberglass rods (five) Stainless steel hose clamps (two)
4" plastic wire ties (one bundle 30 count) Plastic stakes (two)

Tools required for set up:

Six foot ladder, screw / nut driver
